

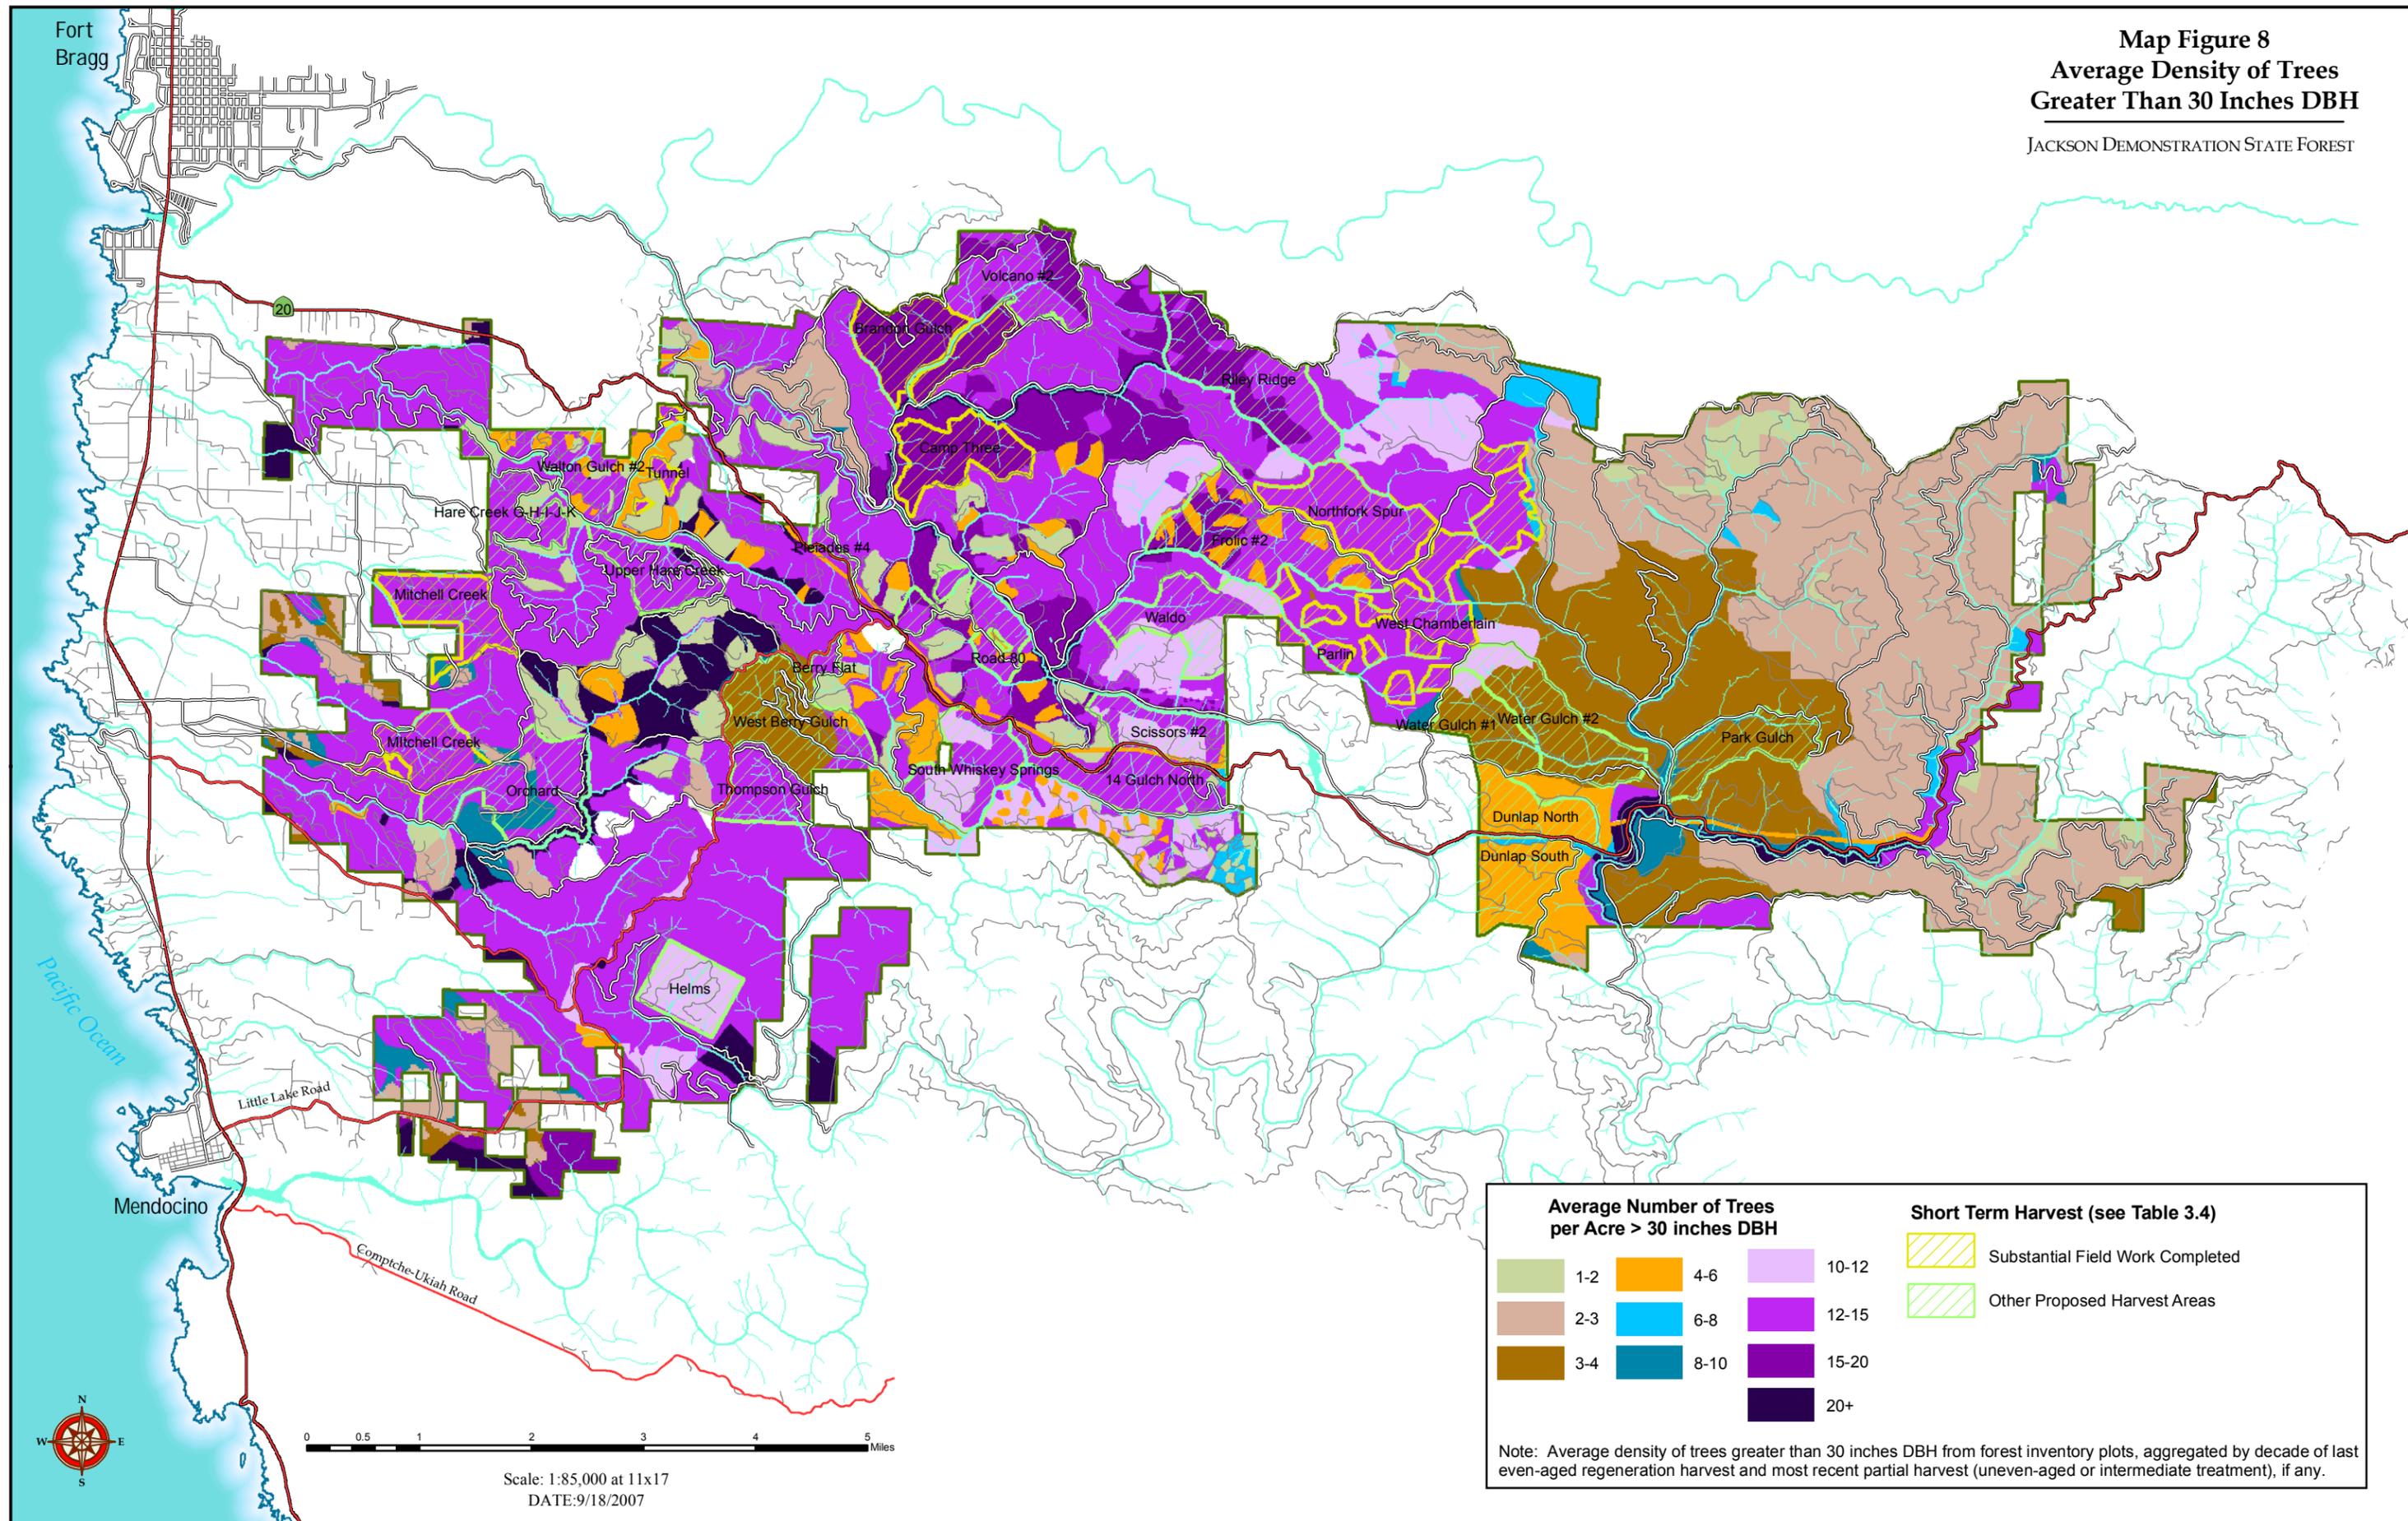

Map Figure 8
Average Density of Trees
Greater Than 30 Inches DBH

JACKSON DEMONSTRATION STATE FOREST

Average Number of Trees per Acre > 30 inches DBH			Short Term Harvest (see Table 3.4)		
	1-2		4-6		Substantial Field Work Completed
	2-3		6-8		Other Proposed Harvest Areas
	3-4		8-10		
			10-12		
			12-15		
			15-20		
			20+		

Note: Average density of trees greater than 30 inches DBH from forest inventory plots, aggregated by decade of last even-aged regeneration harvest and most recent partial harvest (uneven-aged or intermediate treatment), if any.
