Excavation of rock material for use during timber operations will occur.

- No
  - SMARA does not apply to timber operations.
  - The activity is exempt from SMARA. Where necessary, mitigate any significant adverse impacts that may result from the activity.

- Yes
  - Is the area disturbed by mining activity >1 acre in size or the material excavated cumulatively >1000 yards³ per location? (§ 2714(d))
  - No
    - Timber operations may commence once the proper harvest document is acquired from CDF.
  - Yes
    - The activity is not exempt from SMARA. Surface mining operations may occur once a permit is obtained from, a reclamation plan has been submitted to and approved by, and financial assurances for reclamation have been approved by, the SMARA lead agency. An interim management plan may be necessary. Incorporate any applicable provisions into the harvest document. ([§§ 2770(a), 2770(h)(1), 2772, 2773.1(a)])

---

1. Are the excavated materials for use on the same property for timber operations only and not to be sold for commercial purposes?
2. Is the mined area >100 ft from Class I and/or >75 ft from Class II watercourses?
3. Will the excavation occur on the same ownership as timber operations?
4. Will slope stability and erosion be controlled per 14 CCR §§ 3704(f) and 3706(d)?
5. Will implementation of re-vegetation measures and post-closure uses occur, where necessary, in consultation with CDF at site closure? ([§ 2714(j)(1) and (2)])

The activity is exempt from SMARA. Slope stability and erosion must be controlled in accordance with 14 CCR §§ 3704(f) and 3706(d) and, upon closure of the site, the person closing the site must implement, where necessary, re-vegetation measures and post-closure uses in consultation with the Department of Forestry and Fire Protection. ([§ 2714(j)(2)])
